

WideTEK 36ART at Palbric Art Foundation Laboratory

Art and music are the universal languages we can all enjoy; our vision is to use art to speak to the world. Our objectives are to celebrate diversity, encourage and facilitate integration, in order to reduce xenophobia. We begin with our featured artist, Miloš Reindl, a remarkable Czech-Canadian artist and onetime political refugee.

PAF LAB is a place that serves both as an archive and research facility, with possibility to scan the collection of our paintings to further our goals. „3d lightning“ feature of WideTEK 36ART will be used in our own animated stories.
