

WideSCAN™: Innovation in industrial machine vision

The largest manufacturer of wide format scanners, who is the technology leader with its [BookTEK®](#) and [WideTEK®](#) products, entered the machine vision market: With the [WideSCAN™](#) line of products Image Access is redefining standards in the world of machine vision.

Whether it's quality control or fully automated inspection systems, WideSCAN Line Scan Bars deliver maximum precision, flexibility, and reliability for modern production workflows. More and more manufacturers are already integrating WideSCAN technology into their production equipment.

WideSCAN 24 Single Line Scan Bar

Powerful performance across industries

Ideal for capturing even the finest details – from material inspection and electronics manufacturing to specialized applications like carbon fiber production. Our technology guarantees ultra-sharp and geometrically correct images, enabling precise downstream processing in line with the highest industrial standards.

Key benefits at a glance

- Ultimate flexibility: Multiple sensor technologies for diverse use cases
- Built to last: Rugged design with durable components
- Future-ready: Extended warranty options available
- Seamless integration: Effortlessly integrates into existing machine vision systems
- Low maintenance: Fanless design, dust-resistant, IP54 protected

Variants & technologies

Whether large-area scans, maximum image quality, or extended light spectra – WideSCAN offers the right technology for every application.

CIS Sensors

(Contact image sensor)

Scan widths from 305 mm to 3050 mm (12" to 120") – perfect for large-area, high-speed, precision scanning.

[LEARN MORE](#)

CCD Sensors

(Charge coupled device)

Scan widths from 305 mm to 1220 mm (12" to 48") – for the most demanding applications requiring top-tier image quality.

[LEARN MORE](#)

Multispectral UV/IR

(Ultraviolet & infrared)

CCD camera box in a 12-inch version for applications requiring extended spectral capabilities.

Attractive pricing

WideSCAN products start at €100 per inch.

Examples from our current price list:

- WideSCAN-12 CIS: €1,200
- WideSCAN-24 CIS: €2,400
- WideSCAN-48 CCD: €9,600

(All prices ex-works Wuppertal, Germany, plus VAT.)

Explore the full price list and detailed information on our WideSCAN website.

ABOUT IMAGE ACCESS

Image Access is the technology leader in large-format scanning, offering solutions for all market segments. Our devices are designed and manufactured in Germany, representing the highest standards of quality.

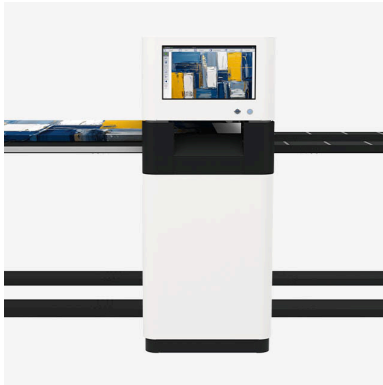

BookTEK® book scanners for bound materials up to A1+ format

WideTEK® sheet-fed scanners for documents up to 60"

WideTEK® flatbed scanners for formats up to A1+ / 36" x 24"

WideTEK® ART contact-free art scanners for formats up to 60" x 80"

WideSCAN™ machine vision products for optimizing modern production processes

WideTEK® MFP solutions for seamless integration of large format scanning and printing
