

### Image Access To Show Bookeye® 5 V2A Automatic Book Scanner at the 2022 RSA Spring Conference

Wuppertal, Germany – April 05, 2022

Image Access LP is proud to announce that we will be attending the RSA Spring Conference 2022. The Spring meeting will be held in Lexington, Kentucky from April 20th through April 22nd. We will present the new [Bookeye 5 V2A Automatic](#) Book Scanner during the vendor reception on the evening of April 20th.

We invite all the RSA members to come and visit with us during this event. We are greatly looking forward to meeting with all of our old friends and welcoming new friends at [RSA Corporation Spring Conference 2022](#).

With its 600 dpi and a scan time of less than 3 seconds for the entire A2+ capture area, it is equally suitable for both large and small digitization projects. The new, motor-driven V-shaped glass plate, ensures the most gentle digitization of your books and source documents. The V-shaped glass plate is controlled via the ScanWizard's extended user interface. The new control panel with animated function buttons allows, horizontal movement up and down, setting the speed or position in which the glass plate remains after the finished scan job. Like all other Image Access Bookeye book scanners, the book cradle can also be used in flat mode.

A 21 inch full HD multitouch screen allows the operator to control image quality and make many modifications on the fly. Attach a second, optional screen to operate the scanner with the main touchscreen and preview images using the second screen. The Live Preview function uses a second matrix camera to present a live video view of the document position before scanning.

The [Bookeye® 5 V2A Automatic](#) book scanner is the perfect solution for demanding applications, highly efficient reproduction, and preservation projects of highly sensitive source material in libraries, archives, offices and more.

We look forward to meeting you at RSA Spring Conference in Lexington, Kentucky!
