

VISION 2022 - Image Access participating as exhibitor for the first time

Wuppertal, Germany – September 15, 2022

Image Access will exhibit for the first time at [VISION](#) in Stuttgart from 04 - 06 October 2022. VISION is the worlds leading trade show for image processing. Image Access will present its new [Wide SCAN bars](#), which are suitable for a wide range of inline inspections and scanning applications and are available in four different lengths of 12, 24, 36 and 48 inches.

The [WideSCAN](#) bars require only a low 24V and either one or two USB 3 connections. An optional rotary encoder input allows for on the fly synchronization with the speed of the objects to be scanned. Speed ranges from 6 inches per second at 600dpi color to 68 inches per second at 300dpi monochrome independent of the length. It can be integrated into almost all single-pass printers for the purpose of nozzle correction and streak elimination.

Also on display will be the [WideTEK 24F](#) flatbed scanner, which digitizes originals up to DIN A2+. Fast as lightning, it performs a full 600dpi color scan of the entire surface in less than 4 seconds. During those few seconds, the image is compressed and sent over the network, all while the competitor's product is still working on its 200dpi scan. The 1200dpi resolution provides details of the scanned document not even visible to the human eye. [WideTEK 24F](#) features a solid glass plate protecting the scanner from being exposed to dirt and dust, wet ink or paint, or any other objects.

We look forward to seeing you at VISION, come by our booth 10C87 in Hall 10.

About Image Access

Image Access is the technology leader in the large format scanning market and offers products in all large format segments: Bookeye® overhead scanners for books more than A1 in size, WideTEK® 36ART contact-free fine art scanner for formats up to 36 x 60 inches, WideTEK® flatbed scanners for formats more than A2 / 25x18.5", WideTEK® sheetfeed scanners for documents between 36", 48" and 60" as well as WideTEK® MFP solutions for every wide format printer on the market.
