

Image Access on Tour to Two Major North American Shows AAM and Graphics Canada

Wuppertal, Germany – April 05, 2023

Image Access LP will exhibit at [Graphics Canada](#) in the Toronto International Centre from May 11 to May 13, 2023. This year is the 60th anniversary of Graphics Canada, the country's longest-running and most popular trade show for graphic arts and printing. From May 19 to 22, 2023, Image Access will attend and exhibit at the [American Alliance of Museums Expo](#) in Denver, Colorado.

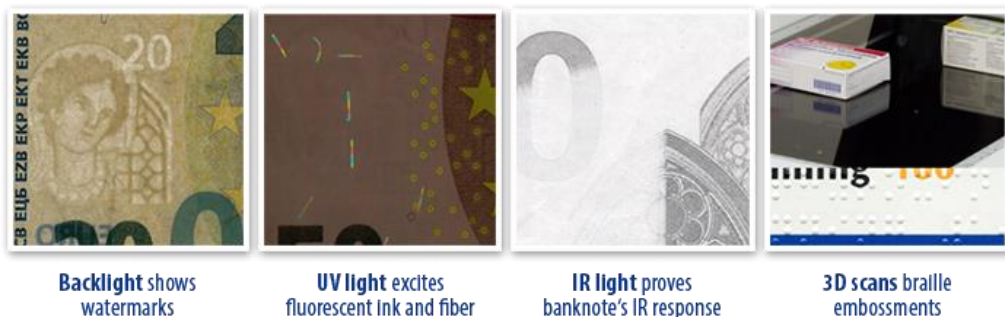

Visitors to Graphics Canada can visit Image Access at **booth #5648**, cosponsored by our partner in Canada, The Drafting Clinic, to see the [Bookeye® 5 V2 Professional](#) overhead book scanner with an optical resolution of 600dpi and client interface for 3rd party software to meet the highest quality standards.

The AAM Annual Meeting first started in 1906 and has grown to over 5,000 attendees, becoming the largest museum conference in the United States. It brings together museums of all types and sizes — from art and history museums to zoos and botanic gardens — to share ideas and make connections that are transformational.

Image Access will exhibit together with our partner Large Document Solutions in **booth #1629**. Come by to see the [Bookeye® 5 V1A Professional](#) and the [Bookeye® 5 V2 Archive](#), both of which are perfect solutions for preservation projects and scanning highly sensitive source material. The [WideTEK® 12 SPECTRUM](#) will also be at the booth. It is the world's fastest UV, VIS, IR, 3D and backlight flatbed scanner in A3+ (12 x 18 inch) format.

Be inspired by our [Bookeye® 5 book scanners](#) and experience [the fastest multilight and 3D flatbed scanner on the market](#). Join Image Access at one or both of these major events. If you would like more information about these two events, [please send us an email and ask about tickets](#).

About Image Access

Image Access is the technology leader in the large format scanning market and offers products in all large format segments: Bookeye® overhead scanners for books more than A1 in size, WideTEK® 36ART contact-free fine art scanner for formats up to 36 x 60 inches, WideTEK® flatbed scanners for formats more than A2 / 25x18.5", WideTEK® sheetfeed scanners for documents between 36", 48" and 60" as well as WideTEK® MFP solutions for every wide format printer on the market.
