

Image Access Exhibits Bookeye® 5 Scanner Family at IFLA in Rotterdam

Wuppertal, Germany – August 15, 2023

After overcoming the global pandemic, an increased demand for digitization has emerged. Answering this increased demand, Image Access is particularly pleased to present our digitization solutions at [this year's IFLA conference](#). The corresponding exhibition will be held in Rotterdam, open from Monday, August 21 through Thursday the 24th.

Let's work together, let's library

World Library and Information Congress
88th IFLA General Conference and Assembly
21-25 August 2023, the Netherlands

Image Access will display the full range of brand new Bookeye® book scanning solutions at our booth A9. The [Bookeye® 5 generation](#) will be on display at the IFLA Congress in various sizes and models.

The [Bookeye® 5 V3 Kiosk](#) is a handy and smart alternative to copiers. You can even use this self-service system for scanning directly to your mobile devices.

An even more performant system is the [Bookeye® 5 V2S Semiautomatic](#) with its motor driven glass plate. The Bookeye 5 V2S Semiautomatic can also scan either in V-shape or in a horizontal position.

The [Bookeye® 5 V2 Archive](#) is a true production scanner. This versatile system is perfect when high quality and maximum productivity scanning in combination with the gentle treatment of books is required. The unique self-adjusting book cradle solution allows scanning either at a 120 degree angle or in horizontal mode.

Finally, we are happy to present the [Bookeye® 5 V1A](#) model, a scanner for larger material such as bound newspapers. This scanner's book cradle supports fully opened books at 180°, with or without the glass plate, as well as partially opened books via its V-shaped book cradle, all in one device.

As you can see, there are so many good reasons to visit Image Access at IFLA. We are looking forward to welcoming you in the Netherlands, Rotterdam, at our booth!

About Image Access

Image Access is the technology leader in the large format scanning market and offers products in all large format segments: Bookeye® overhead scanners for books more than A1 in size, WideTEK® 36ART contact-free fine art scanner for formats up to 36 x 60 inches, WideTEK® flatbed scanners for formats more than A2 / 25x18.5", WideTEK® sheetfeed scanners for documents between 36", 48" and 60" as well as WideTEK® MFP solutions for every wide format printer on the market.
