

Image Access To Sponsor At RSA And ReproMAX Conferences

San Diego and Dallas, USA – April 10, 2018

In April 2018, Image Access LP will attend two reprographic association conferences in the U.S. as a vendor sponsor; the RSA Shareholder's Meeting in San Diego and the ReproMAX Annual Spring Conference

The ReproMAX Annual Spring Conference in Dallas Texas on April 11-13 will be held at the Hilton Park Cities Dallas, as well as at ReproMAX partner Thomas Printworks' shop location in Addison. Image Access LP will participate in this annual event as a vendor sponsor of the conference and will present the WideTEK 36ART fine art scanner to the attendees during the evening reception at the Addison facility on April 11. ReproMAX is a network of independent digital print service providers (PSPs) that provides a wide variety of services to their members.

The new WideTEK® 36ART-600 was specifically designed for archiving and reproduction of works of art. Reprography specialists can offer fine art digitization as a service, which has already proven to be a lucrative market. Using the WideTEK® 36ART-600 together with large format printers from HP, Canon and EPSON, the WideTEK® 36ART brings the basis for professional art reproduction. Native printer drivers installed on the scanner make color accuracy on the resulting image even higher. This functionality makes the WideTEK 36ART an interesting opportunity to open new revenue streams to reprographers in both associations.

Image Access LP will participate as a vendor sponsor at the Reprographic Services Association (RSA) Annual Spring Conference April 19-21 at the Paradise Point Resort & Spa in San Diego, California. Formed in 1988, the Reprographic Services Association (RSA) is a North American network of over 84 companies with more than 175 locations. RSA offers member reprographers strategies to add new product and service offerings to their portfolio, revise business plans, cope with a new breed of competition, seek new markets of opportunity, update pricing models, and react to shrinking revenue and margin opportunities.

Image Access LP will feature the WideTEK 36ART fine art scanner at the evening reception on April 19, highlighting the various business opportunities that this new scanner type offers, even outside the fine art scanning market.

About Image Access

Image Access has been a creative, inventive force setting itself apart from the competition as a manufacturer of professional scanner solutions. All scanners manufactured by Image Access are operated through the unique web based Scan2Net® interface, which allows seamless network scanning on all Internet enabled platforms. Image Access is the only scanner manufacturer that offers products in all large format segments: Bookeye® overhead scanners for valuable books more than A1 in size, WideTEK® large format art scanner for formats up to 36 x 60 inches, WideTEK® flatbed scanners for formats greater than DIN A3 / 12.5x18.5 inches and WideTEK® sheetfeed scanners for documents between 36 and 48 inches in width, duplex scanners for high volume production of double sided scans up to 36 inches.
