

Image Access Exhibits New Products at the IFLA Exhibition in Kuala Lumpur

Wuppertal, Germany - August 15, 2018

Image Access exhibits every year at the IFLA World Library Information Congress and will again bring the latest products to the [2018 IFLA Exhibition](#).

This year, this major international conference will be held in the capital of Malaysia, Kuala Lumpur. The exhibition will open on Saturday, August 25th and close Tuesday the 28th.

On our booth B150, we will have a premiere as we display two new models for the first time at IFLA: the [Bookeye® 4 V2 Semiautomatic](#) and the [WideTEK® 36ART](#). You can see the WideTEK 36ART in action on the [Image Access YouTube channel](#).

For the Bookeye®, the world's number 1 book scanner, the benefit to libraries is obvious. We are very proud and happy to present this new model as the latest addition to our long standing collection of sophisticated book scanners.

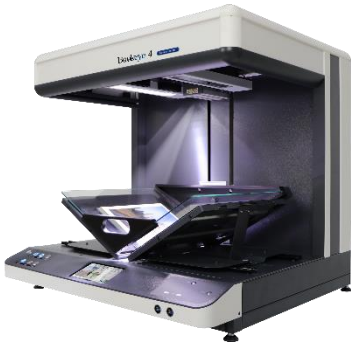

With the WideTEK® 36ART, we introduce a new technology to the library world. Particularly in Asia, we see many interesting applications, as here you can find scripts and books on a variety of materials. Books on palm leaves, Chinese calligraphy as well as rolled texts and paintings, can all be scanned contact free on the WideTEK36ART. The maximum resolution for doing so is 600 DPI on the overall A1 format and you will be amazed to see the brilliant results.

As you can see, there are many good reasons to visit Image Access at IFLA! We are looking forward to welcoming you at our booth!

About Image Access

Image Access is the technology leader in the large format scanning market and offers products in all large format segments: Bookeye® overhead scanners for valuable books more than A1 in size, WideTEK® ART non-contact fine art scanner for formats up to 36 x 60 inches, WideTEK® flatbed scanners for formats greater than A2 / 25x18.5", WideTEK® sheet feed scanners for documents between 36", 48" and 60" and 36"duplex scanners for high volume production of double sided scans.
